

**Casey Meehan, PhD**, is an educator and sustainability professional on a mission to make sense of what climate change means locally, inspire others to take part in the climate conversation in their own way, and elevate the creative responses that emerge.

Currently the Director of Sustainability and Resilience at Western Technical College, Casey uses the UN Global Goals to champion authentic connections between sustainability and the culture and operations of the college. In this role he also serves as the program director for the Sustainability Institute, a 501c3 organization dedicated to celebrating & advancing sustainability efforts within the Driftless region

Casey is also an associate lecturer at the University of Wisconsin-La Crosse where he teaches principles of sustainable business. He has presented his research and work at local, national, and international conferences and currently sits on the Association for the Advancement of Sustainability in Higher Education (AASHE) advisory council.

Before coming to Western, Casey was a faculty member at Bowdoin College in Brunswick, Maine. He attended the United States Naval Academy, earned his PhD from the University of Wisconsin-Madison, an M.Ed from the University of Minnesota-Twin Cities, and history and psychology degrees from UW-Madison. He is certified Sustainability Associate by the International Society of Sustainability Professionals.

Casey blogs about playfulness as a tool to engage more people in responding to the climate emergency at [CaseyRMeehan.com](http://CaseyRMeehan.com).

He currently lives in La Crosse, Wisconsin, with his wife, two young boys and dog.
